Annual Medicare Program Statistics

The Health Care Financing Administration (HCFA) is responsible for the Medicare program and Federal participation in State-operated Medicaid plans. HCFA's mission is to finance "...the timely and economic delivery of appropriate health care to eligible beneficiaries." HCFA reimbursement policies have significant and far-reaching effects on providers, beneficiaries, and payers. Understanding these effects and their causes is essential to the planning and implementation of cost-saving initiatives.

Within HCFA, the Bureau of Data Management and Strategy (BDMS) is responsible for the development of systems and computer programs to establish and maintain the national Medicare statistical files. BDMS develops and coordinates agency statistical policy and develops statistical methods for the economic analysis of health care financing issues and proposals.

This *Annual Medicare Program Statistics* report contains data on Medicare enrollment, reimbursement, and utilization. The data can be useful to health care managers, planners, and researchers, particularly for those examining cost-saving alternatives for health care delivery methods.

S. Medicare utilization—Number of aged persons served per 1,000 enrolled, amount reimbursed per person served, and percent change, by type of supplementary medical insurance service, age, sex, race, and area of residence: 1967, 1981, and 1982 28

T. Medicare utilization—Number of disabled persons served per 1,000 enrolled, amount reimbursed per person served, and percent change, by type of coverage, age, sex, race, and area of residence: 1974, 1981, and 1982 31

U. Medicare utilization—Number of disabled persons served per 1,000 enrolled, amount reimbursed per person served, and percent change, by type of hospital insurance service, age, sex, race, and area of residence: 1974, 1981, and 1982 34

V. Medicare utilization—Number of disabled persons served per 1,000 enrolled, amount reimbursed per person served, and percent change, by type of supplementary medical insurance service, age, sex, race, and area of residence: 1974, 1981, and 1982 37

W. Medicare utilization—Number of aged persons served under hospital insurance and/or supplementary medical insurance per 1,000 enrolled, amount reimbursed per person served, and percent change, by census division and State: 1967, 1981, and 1982 40

X. Medicare utilization—Number of disabled persons served under hospital insurance and/or supplementary medical insurance per 1,000 enrolled, amount reimbursed per person served, and percent change, by census division and State: 1974, 1981, and 1982 42

Y. Medicare utilization—Number of aged and disabled enrollees with and without reimbursement, amount reimbursed, and percent distribution, by type of coverage and reimbursement interval: 1982 44

I. Trends

Medicare enrollment

Medicare enrollment data provides information on the aged and disabled populations covered by the hospital insurance (HI) and supplementary medical insurance (SMI) programs. Detailed enrollment tables for 1982 are presented in Section II. They include comprehensive data on demographic characteristics and geographic distributions.

This section contains highlights, trend data, and a variety of other enrollment data not included in the detailed tables. Trend and summary tables immediately follow the text. Counts of beneficiaries are as of July 1 of the years shown unless otherwise noted.

All persons

- On July 1, 1982, 29.5 million aged and disabled persons were enrolled for HI and/or SMI. At the beginning of the program in 1966, 19.1 million aged persons were enrolled in Medicare.
- Total enrollment in 1982 increased 1.7 percent over the 29.0 million enrollment in 1981.
- In 1982, Medicare enrollees residing in the United States represented 12.4 percent of the total resident population; in 1966, they represented 9.6 percent.
- Almost 99 percent of the total Medicare population was enrolled for HI in 1982; over 96 percent was enrolled for SMI.
- During 1982, 2.1 million persons were newly enrolled in HI and 2.2 million in SMI.
- In 1982, HI enrollment under Medicare terminated for 1.6 million persons—90.6 percent because of death. Under SMI, 88.5 percent were terminated because of death.
- In 1982, 661,000 persons, 2.2 percent of the total Medicare population, were enrolled in Medicare contracting prepaid health plans.

Aged persons

- Enrollment of aged persons under Medicare has increased at an average annual rate of 2.1 percent, from 19.1 million in 1966 to 26.5 million in 1982. The 1982 increase was 2.0 percent over 1981.
- Approximately 97 percent of the total U.S. population 65 years of age or over had some type of Medicare coverage.
- Persons eligible for social security benefits accounted for 82.1 percent of all aged HI enrollees in 1966 and 95.1 percent in 1982.
- Enrollment of the aged in HI grew from 19.1 million in 1966 to 26.1 million in 1982, a 2.0 percent annual rate of change. Enrollment in SMI grew faster. The increase from 17.7 million enrollees in 1966 to 25.7 million in 1982 represents a 2.3 percent annual growth rate.
- The number of aged persons with only SMI coverage rose from 26,000 in 1966 to 425,000 in 1982, and now represents 1.6 percent of the total aged Medicare population.
- Under HI, persons 85 years of age or over accounted for 10.0 percent of the total enrollment of the aged in 1982—up from 6.2 percent in 1966. This age group also had the highest average annual percentage increase since 1966 (5.1 percent). Similar patterns emerged for the SMI program.
- In 1982, about 6 out of 10 aged enrollees under HI or SMI were females. Since 1966, the percentage of females enrolled has increased steadily. Under SMI, for example, the annual rate of increase in females enrolled between 1966 and 1982 was 2.6 percent compared with 1.9 percent for males.
- Between 1966 and 1982, persons of races other than white increased faster among aged HI enrollees (2.9 percent annualized) than did white persons (1.9 percent annualized). For both HI and SMI, persons of races other than white accounted for 8.9 percent of the aged Medicare population of known race.
- By region, the highest proportion (one out of three) of the aged U.S. Medicare population resided in the South; the lowest proportion resided in the West (one out of six).
- Between 1966 and 1982, enrollment growth of aged HI enrollees was greatest in the South and West (2.8 percent per year) and lowest in the Northeast (1.2 percent per year). Under SMI, growth was greatest in the South (3.2 percent per year) and lowest in the Northeast (1.5 percent per year).
- Almost 55 percent (14.0 million) of the aged HI population resided in metropolitan areas having a central city.
- During 1982, 1.8 million aged persons were newly enrolled in HI and 1.8 million in SMI.

Disabled persons

- Almost 3.0 million disabled persons were enrolled for HI in 1982 compared with 1.7 million when coverage started in 1973.
- The annual rate of growth in enrollment for the disabled declined while aged persons showed a relatively steady rate of growth (Figure 1).
- In 1982, more than one-half of the disabled enrollees were between 55 and 64 years of age. About 3 out of 10 of the disabled were between 60 and 64 years of age.
- Between 1973 and 1982, enrollment of disabled beneficiaries under 35 years of age increased faster than any other age category.
- Unlike the aged Medicare population, a majority (63 percent) of disabled enrollees were males. However, since 1973 the percentage of female enrollees has increased slightly.
- More than 8 out of 10 persons in the disabled Medicare population were white. Enrollment of disabled persons of minority races nearly doubled between 1973 and 1982.
- About 2 out of 3 disabled persons lived in metropolitan areas; more than 1 out of 3 resided in the South.
- Nearly 7 percent of disabled enrollees attained 65 years of age during 1982 and were automatically converted to aged status.
- About 4 percent of disabled enrollees recovered from disabilities and their coverage by Medicare was terminated.

Persons enrolled under State buy-in agreements

- In 1982, 2.8 million persons were enrolled for SMI under State buy-in agreements. This constituted 9.9 percent of the total SMI population.
- For aged beneficiaries, the number of SMI buy-ins increased from 1.1 million in 1967 to 2.3 million in 1982. In 1967, buy-ins represented 6.3 percent of the total aged SMI population; in 1982, about 9.0 percent.
- Disabled beneficiaries enrolled under State buy-in agreements have grown in number from one-quarter million in 1973 to one-half million in 1982. In 1973, buy-ins represented 16.0 percent of the U.S. disabled SMI population; in 1982, 18.9 percent.
- In 1982, the States having the highest percentages of buy-ins relative to their total SMI populations were: Mississippi (27.2 percent), Alabama (22.1 percent), and California (21.4 percent). Those with the lowest percentages were: New Hampshire (2.6 percent), Connecticut (2.8 percent), and Minnesota (3.0 percent).

Medicare reimbursement

Medicare reimbursement data provides information on the hospital insurance (HI) and supplementary medical insurance (SMI) programs summarized by the States and counties in which beneficiaries reside. Detailed tables for 1982 are presented in Section III. Enrollment counts are provided with reimbursement amounts for comparative purposes. Data are shown for all persons, aged, disabled, and end-stage renal disease (ESRD) beneficiaries. For institutional providers under HI and SMI, amounts reimbursed reflect interim payments from bills approved for payment during the calendar year. Interim reimbursements do not include retroactive adjustments which are a result of cost determinations made at the end of the fiscal year. Enrollment counts are as of July 1.

These highlights and trends summarize the main findings.

All persons

- Medicare reimbursements grew from $5.3 billion in 1968 to $48.1 billion in 1982. The annual rate of growth was almost 6 times faster than enrollment growth over the same period.
- In 1968, reimbursements under HI accounted for 71.2 percent of total Medicare reimbursements; SMI reimbursements accounted for 28.8 percent. In 1982, HI was 69.2 percent of the total and SMI was 30.8 percent.
- From 1968 to 1982, reimbursements grew at a 17.1 percent annual rate. The annual growth rate for HI was 16.9 percent; for SMI it was 17.6 percent.
- From 1981 to 1982, total reimbursements increased 21 percent.
- In 1982, the average annual reimbursement per person enrolled was 6 times higher than in 1968. The average reimbursement for HI was $1,147 in 1982 and $191 in 1968; for SMI it was $521 and $81, respectively.
- In 1982, the highest average reimbursements per enrollee were for residents of the District of Columbia, Nevada, California, Alaska, and Michigan. The lowest average reimbursements per enrollee occurred in Idaho, Utah, North Carolina, South Carolina, and Kentucky.

Aged persons

- Reimbursements for the aged amounted to $41.8 billion, or 86.8 percent of total reimbursements in 1982.
- For aged persons, SMI reimbursements as a percentage of total reimbursements increased slightly from 28.8 percent in 1968 to 29.7 percent in 1982.
- Aged enrollees were reimbursed an average of $1,574 in 1982 compared with $267 in 1968. This represents an average annual increase of 13.5 percent.

Disabled persons

- In 1982, Medicare reimbursed $6.3 billion for disabled beneficiaries.
- In 1974, 8.7 percent of total reimbursements were for the disabled; in 1982, 13.2 percent.
- Reimbursements for the disabled have increased at an average annual rate of 26.3 percent since 1974. The increase from 1981 to 1982 was 19.7 percent.
- From 1974 to 1982, average reimbursement per disabled enrollee increased 19.7 percent annually, from $509 to $2,149.
- Reimbursements for persons eligible solely because of ESRD accounted for 11.5 percent of total expenditures for disabled persons in 1982.
- Average reimbursement for persons eligible solely because of ESRD was $26,772 in 1982; $11,517 in 1974.
- Table O illustrates the impact of ESRD reimbursements on average SMI reimbursement per disabled enrollee. When reimbursements for services to ESRD patients are removed, average reimbursement per disabled enrollee ($550) is much closer to average reimbursement per aged enrollee ($478).

Medicare utilization

Medicare utilization data provides information on persons served, services used, and amounts reimbursed. Data are shown for the aged and the disabled (including those with end-stage renal disease) for hospital insurance (HI) and supplementary medical insurance (SMI). Detailed tables for 1982 are presented in Section IV. They include comprehensive demographic and geographic distributions.

This section contains highlights and trend data to show 1982 experience in historical perspective. Data on persons served and amounts reimbursed include experience only for persons who exceeded annual deductibles, and for whom bills were submitted which resulted in reimbursement.

All persons

- In 1982, 18.8 million persons used Medicare services. The number of those persons who received reimbursed services has increased 164 percent since 1967—the first full year of Medicare.
- Nearly two-thirds (63.8 percent) of persons eligible on July 1 received reimbursed services in 1982. This figure has increased since 1967 when just over one-third (36.6 percent) of eligible persons received reimbursed services. (The SMI deductible was $50 annually from 1966 through 1972, $60 from 1973 through 1981, and $75 in 1982. These relatively fixed SMI deductibles coupled with rapidly increasing approved charges for SMI services accounted for most of the increase in the percentage of persons exceeding the deductible, and therefore, receiving reimbursement.)
- Medicare reimbursements increased approximately 20 percent from 1981 to 1982. Since 1967, annual reimbursements have increased more than elevenfold (1,025 percent).
- Almost 7.1 million persons had one or more hospitalizations in 1982. The rate of persons receiving inpatient care per 1,000 enrollees increased slightly over that for 1981.
- The proportion of enrollees experiencing hospital stays has increased steadily since the program began. In 1967, 18.5 percent of aged persons enrolled on July 1 were inpatients at some time during the year; in 1982 this figure was 24.3 percent for the aged and disabled.
- Physicians' services were used by 18.0 million persons in 1982. These persons represented 95.7 percent of persons with reimbursable services and 63.4 percent of persons enrolled for SMI. (Additional persons used physicians' services but did not exceed the deductible or submit bills, and thus are not reflected as persons served in these data.)
- There was a large shift in home health agency (HHA) services from SMI to HI in 1982. Persons receiving HHA services under HI increased 21.8 percent and reimbursements increased 45.6 percent. Under SMI, persons receiving HHA services decreased 91.3 percent and reimbursements decreased 80.8 percent. (The Omnibus Reconciliation Act of 1980 removed the 3-day hospital stay as a precondition for HHA services under HI. The Act provides that services previously paid by HI and SMI will now be paid by HI.)

Aged persons

- Persons 65 years of age or over represented 90.0 percent of Medicare enrollees and 90.4 percent of persons served in 1982.
- Reimbursement for services to aged persons was 87.1 percent of total reimbursements.
- Reimbursements per person served were higher for older age groups. In 1982, average reimbursement for persons 65-74 years of age was $2,172; for persons 85 years of age or over it was $2,960.
- The proportions of aged persons receiving services were larger for successively older age groups. In 1982, 60.0 percent of persons 65-74 years of age, 69.1 percent of persons 75-84 years of age, and 73.3 percent of persons 85 years of age or over used services.
- A higher proportion of aged females (66.2 percent) used covered services than did males (61.1 percent) in 1982. Use rates have increased for aged persons of both sexes since the program started, but the higher rates for females have been a consistent trend.
- Proportionately more white persons (64.8 percent) than persons of other races (58.6 percent) used services in 1982. This difference is also consistent with previous years.
- One exception to the general age, race, and sex patterns of use for the elderly occurred for inpatient hospital care. In 1982, a higher proportion of aged males (25.3 percent) experienced hospitalizations than did aged females (23.6 percent).
- Rates of aged persons served per 1,000 enrollees in 1982 were considerably higher in the Northeast (691) and West (677) than in the North Central (626) and South (628).
- Among the States in 1982, the rate of aged persons served per 1,000 enrolled ranged from 553 in Kentucky to 769 in Rhode Island.
- Reimbursements per aged person served in 1982 increased in every State. Increases of 30 percent or more over 1981 occurred in Hawaii, District of Columbia, Wyoming, and Nevada. The smallest increases occurred in Alaska, Rhode Island, Minnesota, and Georgia.
- A very small proportion of aged persons account for a substantial percentage of Medicare reimbursements for the aged. Nearly one-third (31.3 percent) of 1982 reimbursements resulted from medical care treatments to 2.0 percent of enrollees.

Disabled persons

- Disabled persons were 10.0 percent of Medicare enrollees and 9.6 percent of persons served in 1982.
- Services to disabled persons accounted for 12.9 percent of 1982 Medicare reimbursements.
- The numbers of persons served per 1,000 disabled enrollees were higher for successively older age groups. Person use rates ranged from 512 per 1,000 persons under 35 years of age to 677 per 1,000 persons 60-64 years of age.
- A higher proportion of disabled females (70.0 percent) than males (55.6 percent) used Medicare services in 1982. Persons served rates have increased for both sexes since Medicare began coverage for the disabled in 1973, but females have consistently had higher use rates.

- Disabled white persons had a slightly higher percent of persons served (61.1 percent) than did persons of other races (59.9 percent).
- In the West, 672 per 1,000 disabled persons used Medicare services in 1982. In the South, the rate was 586 per 1,000 disabled enrollees. North Central and Northeast rates fell between these high and low rates.
- Reimbursements per disabled person served were gradually lower for older age groups, ranging from $4,005 for persons under 35 years of age to $3,236 for persons 60-64 years of age.
- Reimbursements per person served were higher for females ($3,525) than for males ($3,362), and for persons of all other races ($4,170) than for white persons ($3,279).
- States varied widely in the rates of disabled persons served in 1982. The highest rate of persons served was in California (723 per 1,000 disabled), the lowest in South Dakota (488 per 1,000 disabled).
- Reimbursements per disabled person served increased in all States except Rhode Island. Increases of 35 percent or more occurred in Wyoming, Idaho, and Texas.
- In 1982, 3.4 percent of disabled enrollees accounted for 48.1 percent of reimbursements for services to the disabled. Many of the persons with large medical expenses have end-stage renal disease.

---

[1] Prior to April 1, 1968 outpatient hospital services were covered by hospital insurance (HI) and supplementary medical insurance (SMI). All outpatient hospital services for 1967 are shown as SMI services for purposes of comparison. HI and SMI totals, however, include services paid under their respective trust funds.

[2] Detail may not add to total because of rounding.

II. Medicare enrollment, 1982

Table | Page

Aged

1. All persons enrolled as of July 1, 1982, by type of coverage, type of entitlement, census region, division, and State of residence 49

2. Persons 65 years and over enrolled as of July 1, by type of coverage, age, race, sex, census region, division, and State of residence 51

3. Persons 65 years and over enrolled as of July 1, by type of coverage, age, census region, division, and metropolitan-nonmetropolitan residence 69

4. Persons 65 years and over enrolled as of July 1, by type of coverage, race, sex, population size groups of standard metropolitan statistical areas, and for each area of 500,000 or more in 1980, United States 71

5. Persons 65 years and over enrolled by type of coverage, age, race, sex, and month of coverage 75

6. Persons 65 years and over ever enrolled during 1982 for hospital and/or medical insurance by age, race, sex, census region, division, and State of residence 79

Disabled

7. Disability beneficiaries enrolled as of July 1, by type of coverage, age, race, sex, census region, division, and State of residence 88

8. Disability beneficiaries enrolled as of July 1, by type of coverage, age, census region, division, and metropolitan-nonmetropolitan residence 97

9. Disability beneficiaries enrolled as of July 1, by type of coverage, race, sex, population size groups of standard metropolitan statistical areas, and each area of 500,000 or more in 1980, United States 98

10. Disability beneficiaries enrolled by type of coverage, age, race, sex, and month of coverage 102

11. Disability beneficiaries ever enrolled during 1982 for hospital insurance, by age, race, sex, census region, division, and State of residence 104

IV. Medicare utilization, 1982

Table Page

Aged

1. Summary of utilization and reimbursement for persons 65 years and over by region, division, and State 209
2. Persons 65 years and over served by region, division, and State, and type of service 210
3. Persons 65 years and over served: Annual rate per 1,000 enrolled by region, division, and State, and type of service 211
4. Reimbursement for persons 65 years and over by region, division, and State: Total amount by type of service 212
5. Reimbursement per person 65 years and over served by region, division, and State: Average amount by type of service 213
6. Reimbursement per person enrolled by region, division, and State: Average amount by type of service 214
7. Persons 65 years and over served by region, division, and State: Distribution by amounts reimbursed 215
8. Distribution by amounts reimbursed for persons 65 years and over by region, division, and State 218
9. Summary of utilization and reimbursement for persons 65 years and over by age, race, and sex 221
10. Persons 65 years and over served by age, race, and sex, and type of service 222
11. Persons 65 years and over served: Annual rate per 1,000 enrolled by age, race, and sex, and type of service 223
12. Reimbursement for persons 65 years and over by age, race, and sex: Total amount by type of service 224
13. Reimbursement per person 65 years and over served by age, race, and sex: Average amount by type of service 225
14. Reimbursement per person enrolled by age, race, and sex: Average amount by type of service 226
15. Persons 65 years and over served by age, race, and sex: Distribution by amounts reimbursed 227
16. Distribution by amounts reimbursed for persons 65 years and over by age, race, and sex 230

Disabled

17. Summary of utilization and reimbursement for disability beneficiaries by region, division, and State 233
18. Disability beneficiaries served by region, division, and State, and type of service 234
19. Disability beneficiaries served: Annual rate per 1,000 enrolled by region, division, and State, and type of service 235
20. Reimbursement for disability beneficiaries by region, division, and State: Total amount by type of service 236
21. Reimbursement per disability beneficiary served by region, division, and State: Average amount by type of service 237

Table | Page

22. Reimbursement per person enrolled by region, division, and State: Average amount by type of service 238

23. Disability beneficiaries served by region, division, and State: Distribution by amounts reimbursed 239

24. Distribution by amounts reimbursed for disability beneficiaries by region, division, and State 242

25. Summary of utilization and reimbursement for disability beneficiaries by age, race, and sex 245

26. Disability beneficiaries served by age, race, and sex, and type of service 246

27. Disability beneficiaries served: Annual rate per 1,000 enrolled by age, race, and sex, and type of service 247

28. Reimbursement for disability beneficiaries by age, race, and sex: Total amount by type of service 248

29. Reimbursement per disability beneficiary served by age, race, and sex: Average amount by type of service 249

30. Reimbursement per person enrolled by age, race, and sex: Average amount by type of service 250

31. Disability beneficiaries served by age, race, and sex: Distribution by amounts reimbursed 251

32. Distribution by amounts reimbursed for disability beneficiaries by age, race, and sex 254

Table 1 SUMMARY OF UTILIZATION AND REIMBURSEMENT FOR PERSONS 65 YEARS AND OVER BY REGION, DIVISION, AND STATE

Appendix A: Provisions of the law and regulations

The Medicare program (Health Insurance for the Aged) was enacted on July 30, 1965, as Title XVIII of the Social Security Act. The program started on July 1, 1966. Major changes were made in the program's provisions by Public Law 92-603, which was enacted October 30, 1972. Effective July 1, 1973, the name of the Medicare program was officially changed to Health Insurance for the Aged and Disabled. Medicare coverage was extended to disabled beneficiaries under the social security and railroad retirement programs, and to persons under 65 years of age who require dialysis or a kidney transplant for end-stage renal disease (ESRD). (Public Law 95-292 removed the "under age 65" restriction for persons with ESRD, effective October 1978.) In addition, the hospital insurance part of Medicare (discussed below) became available on a voluntary basis to certain people 65 years of age or over who are otherwise ineligible.

Medicare makes available two separate but complementary insurance programs: (1) hospital insurance that covers nearly all persons 65 years of age or over, disabled beneficiaries under 65 years of age who have been entitled to cash benefits for at least 24 months, and workers covered by social security and their dependents with ESRD who require renal dialysis or a kidney transplant, and (2) supplementary medical insurance that covers those persons who voluntarily pay the premiums or on whose behalf premiums are paid.

Hospital insurance benefits

The hospital insurance (HI) program pays for part of the cost of inpatient hospital care. Related health care services provided by skilled nursing facilities (SNF's) (formerly termed extended care facilities) and home health agencies (HHA's) are also covered in part. Services must be provided by institutions and organizations that have been certified as qualified providers of services, and the providers must have signed an agreement to participate in the program. An exception exists for hospitals certified to provide only emergency services.

The limits on services covered by the HI program are based on the concept of a "benefit period." A benefit period begins with the first day of hospitalization and ends when the individual has not been an inpatient in a hospital or skilled nursing facility for 60 consecutive days.

The law requires cost sharing. Beneficiaries are responsible for deductible and coinsurance payments. The Secretary of the Department of Health and Human Services (DHHS) determines the deductible amount under a statutory formula. Under the formula, the deductible for calendar year 1982 was based on the average per diem rate for inpatient services furnished to beneficiaries in calendar year 1980. The deductible amount tends to approximate the current cost of 1 day in a hospital. The coinsurance amount for hospital inpatient care is set at one-half of the deductible, and for skilled nursing facility services it is set at one-eighth of the deductible.

Inpatient hospital

Covered hospital services include room and board in accommodations containing from two to four beds, nursing services (except for private duty nursing), drugs and biologicals, and other services ordinarily furnished by a hospital to its inpatients.

The program does not cover the services of physicians (including staff radiologists, anesthesiologists, pathologists, and psychiatrists) except for services provided by interns or residents under approved teaching programs.

For 1982 services, the program pays for the "reasonable costs" of covered services in a participating hospital for up to 90 days in a benefit period. Full payment is made for the first 60 days of hospitalization less a deductible applicable to each benefit period. The deductible, which is adjusted each year, was $260 in 1982. For each of the days 61 through 90 in a benefit period, the patient pays coinsurance equal to one-fourth of the deductible.

Each hospital insurance beneficiary also has a "lifetime reserve" of 60 nonrenewable hospital days. These days can be used at the beneficiary's option when the 90 days in a benefit period have been exhausted. Lifetime reserve days were subject to a copayment of $130 per day (equal to one-half of the deductible) in 1982.

Prior to 1982, Part A coinsurance payments for inpatient hospital coinsurance days and lifetime reserve days (and also inpatient SNF coinsurance days—see below) reflected the deductible in effect at the beginning of the benefit period. This cost-sharing provision was modified by the Omnibus Reconciliation Act of 1981 (Public Law 97-35). Effective January 1, 1982, Part A coinsurance is based on the deductible for the calendar year in which services are received rather than the deductible in effect when the benefit period began.

The cost of the first three pints of blood (or equivalent amounts of packed red blood cells) furnished a patient during a benefit period is also deductible unless the patient arranges for replacement. Charges for any additional blood are covered under the program, as are charges for blood processing (administration, storage, etc.).

The program also pays for emergency services in a nonparticipating hospital. Each nonparticipating hospital providing emergency services may elect to claim payments from the Medicare program for emergency services rendered beneficiaries in a given year. If the hospital elects this option, reimbursements are made as just described. If the hospital elects not to bill the program, the beneficiary pays the bill and submits the itemized claim to the Health Care Financing Administration (HCFA) through the local social security office. In this case, reimbursement is based on reasonable charges for covered services. Payment rates are 60 percent of reasonable charges for room and board, plus 80 percent of such charges for ancillary services. Deductible and coinsurance provisions still apply.

Hospital insurance benefits also include reimbursement for inpatient tuberculosis and psychiatric hospital services. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. If a patient is in a participating psychiatric hospital or is receiving psychiatric care in a general hospital and becomes entitled to hospital insurance, the number of hospital days in the 150-day period prior to eligibility is deducted from the days of entitlement in that benefit period, but not from the lifetime limitation.

Under special situations, hospital insurance benefits have been extended to cover payments for inpatient services furnished by a foreign hospital. (Related physician and ambulance services are covered under supplementary medical insurance.) The foreign hospital must be accredited by, or have standards equivalent to, the Joint Commission on Accreditation of Hospitals (JCAH).

Skilled nursing facility

Covered extended care services furnished by a skilled nursing facility (SNF) include nursing care; room and board; physical, occupational or speech therapy; drugs and biologicals; medical service of an intern or resident-in-training of a hospital having a transfer agreement with the skilled nursing facility; and other necessary health care services generally provided by such facilities.

The program pays for the reasonable costs of all covered inpatient services in participating skilled nursing facilities for up to 100 days in a benefit period. Benefits are payable only following discharge from a hospital after a stay of 3 consecutive days or more; generally the admission to the facility must occur within 30 days of hospital discharge.[1] Full payment is made for the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance amount per day equal to one-eighth of the inpatient hospital deductible ($32.50 in 1982).

For SNF services to be covered, a physician must certify that the patient needs daily skilled nursing or skilled rehabilitation services and must order the services. The 1972 amendments include a provision for advance approval of extended care services, in certain circumstances.

Home health agency

Covered home health services may include part-time or intermittent nursing care; physical, occupational, or speech therapy; part-time or intermittent services of a home health aide; medical supplies (other than drugs and biologicals) and the use of medical applicances; and, in certain cases, services of an intern or resident-in-training of a teaching hospital. The services must be furnished by, or under arrangements with, an approved home health agency.

Prior to July 1, 1981, coverage under HI provided for payment of the reasonable cost of up to 100 home health visits after a hospital stay of 3 or more days. No deductible or coinsurance was required. The visits must have occurred within a year of a qualifying discharge from a hospital or covered stay in a skilled nursing facility. Effective July 1, 1981, the Omnibus Reconciliation Act of 1980 (Public Law 96-499) removed the 100-visit limit on home health services and the 3-day prior hospitalization requirement.[2] Home health services must be related to treatment of a condition for which the patient received services in a hospital or skilled nursing facility. A home health plan must be established by the patient's physician within 14 days after the hospital or skilled nursing facility discharge. The 1972 amendments include a provision for advance approval of home health coverage similar to that provided for skilled nursing care services.

Supplementary medical insurance benefits

The supplementary medical insurance (SMI) program provides coverage for a variety of medical services and supplies furnished by physicians or others in connection with physicians' services, outpatient hospital services, and home health services. Individuals voluntarily participate in the program. Premiums are paid by, or on behalf of, all beneficiaries, and contributions are made by the Federal Government from general revenues.

Physicians' services covered by the program include visits to the home, office, hospital, and other institutions. The program also pays for other services and supplies, such as drugs and biologicals that cannot be self-administered, if they are furnished as a part of a physician's professional service; diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests; X-ray, radium, and radioactive isotope therapy; splints, casts, and other devices used for reduction of fractures and dislocations; purchase or rental of durable medical equipment; ambulance service; and prosthetic devices that replace all or part of an internal organ. The program also pays for home health visits provided by a certified home health agency (HHA) in accordance with a home health plan established by the patient's physician. (No prior hospitalization is necessary.) Prior to July 1, 1981, payment could be made for up to 100 home health visits in a calendar year. Effective July 1, 1981, the Omnibus Reconciliation Act of 1980 (Public Law 96-499) removed the limit on the number of visits and eliminated the application of the SMI deductible to HHA services under SMI.

Also covered are hospital services incident to physicians' services rendered to outpatients, and outpatient speech and physical therapy services. In addition, effective July 1, 1973, the program covers services of a physical therapist in independent practice furnished in the therapist's office or the patient's home, under a physician's plan. Through 1981, program reimbursement was limited to not more than 80 percent of $100 of incurred expenses in a calendar year. Effective January 1, 1982, the Omnibus Reconciliation Act of 1980 (Public Law 96-499) increased the limit on incurred expenses from $100 to $500.

---

[1] The Omnibus Reconciliation Act of 1980 (Public Law 96-499) changed the period during which admission to an SNF must be effected from 14 days to 30 days, effective December 5, 1980.

[2] This modification made the coverage of home health services under hospital insurance (HI) the same as under supplementary medical insurance (SMI). Because section 1833(d) of the Social Security Act requires that services that can be paid under HI cannot be paid under SMI, virtually all home health services are now paid under the HI program.

Covered services of a licensed chiropractor are limited to treatment by means of manual manipulation of the spine to correct a subluxation demonstrated by X-ray.

In each calendar year through 1972, a $50 deductible had to be satisfied before payment could be made under the SMI program. In 1973, the deductible was raised to $60. Effective January 1, 1982, the SMI deductible was further increased to $75. Bills count toward the deductible on the basis of incurred rather than paid expenses; only charges allowed under the program count toward the deductible. Prior to 1982 a "carryover" provision was provided. Accordingly, covered expenses incurred in the last quarter of the year and applied to the deductible in that year were also credited toward the deductible for the following year. The carryover provision was eliminated by Public Law 97-35, effective January 1, 1982. Expenses applied toward the deductible in any one calendar year must be incurred in that year.

After the deductible has been met, the SMI program pays for 80 percent of the allowed (reasonable) charges for covered physicians' services and most other medical services. Prior to June 1981, deductible and coinsurance requirements did not apply to the services of radiologists and pathologists furnished to hospital inpatients. For such services, "reasonable" charges were reimbursed. Effective June 1981, the Omnibus Reconciliation Act of 1980 (Public Law 96-499) limited this special 100 percent reimbursement of reasonable charges (with no deductible) to doctors who accepted assignment for all services they provided for Medicare inpatients. The Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248) eliminated the 100 percent reimbursement rate altogether. Effective October 1, 1982, Medicare pays for these services on the same basis as for other physicians' services, that is, 80 percent of the reasonable charge after the SMI deductible has been met.

When an independent laboratory bills patients directly and accepts assignment, the Secretary of the Department of Health and Human Services (DHHS) is authorized to negotiate a payment rate with the laboratory for the diagnostic tests it provides for Medicare beneficiaries. Reimbursement on assigned bills is made at 100 percent of the negotiated rate; the deductible and coinsurance requirements do not apply. Hospital services incident to outpatient care are subject to the deductible and are reimbursed at 80 percent of reasonable costs. Since July 1, 1981, the deductible has not applied to home health services. Coinsurance payments for home health services were eliminated after December 1972.

The law sets special limits on the payment for outpatient treatment of mental illness. Coverage is limited to the lesser of $312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges may be reimbursed, the effect is to limit payment to the lesser of $250 or 50 percent of the allowed charges in any year.

Eligibility

Hospital Insurance

Almost all persons 65 years of age or over are eligible for benefits under the hospital insurance (HI) program. This includes those entitled to monthly social security cash benefits or payments from the railroad retirement system. Further, a special transitional provision provides for eligibility of persons who do not qualify for monthy cash benefits on the basis of their own covered employment, or as dependents or survivors of insured workers. The provision applies, generally, to persons 65 years of age or over who (1) attained age 65 before 1968, or (2) attained age 65 after 1967 with not less than three quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which they attained age 65. For persons who reached age 65 after 1968, the amount of work credits (quarters of coverage) needed increased by three quarters each year. For example, six quarters are needed by those who reached age 65 in 1969, nine by those who reached age 65 in 1970, and so on. The transitional provision phased out for persons attaining age 65 after 1974.

Hospital insurance protection under certain circumstances can be retroactive for as many as 12 months. For example, individuals may apply 11 months after they attain age 65 and still be entitled to benefits from the month age 65 was attained.

Effective July 1, 1973, disabled persons entitled for 24 consecutive months to cash benefits under the social security or railroad retirement programs are eligible for the hospital insurance program. The Social Security Amendments of 1980 (Public Law 96-265) removed the consecutive months requirement, effective December 1, 1980. Months from previous periods of disability benefit entitlement can sometimes be counted in determining when the 24-month qualifying period requirement is met. Persons covered include disabled workers under 65 years of age, disabled widows and disabled dependent widowers 50-64 years of age, women 50 years of age or over entitled to mother's benefits who for 24 months met requirements for disability benefits but did not file a claim, and disabled beneficiaries 18 years of age and over who became disabled before age 22. A person must be disabled for 5 months before disability benefits can begin. Therefore, Medicare coverage begins with the 30th month after the first full calendar month of disability.

Hospital insurance protection was also extended to persons under 65 years of age who are currently or fully insured or entitled to monthly social security benefits, and to their spouses or dependent children who have end-stage renal disease (ESRD) which requires renal dialysis or a kidney transplant. Eligibility for coverage begins with the 3rd month after a course in renal dialysis begins. This qualifying dialysis period for ESRD beneficiaries does not apply to persons receiving kidney transplants without starting a dialysis regimen. Eligibility ends 36 months after the month in which an individual undergoes a successful kidney transplanation or 12 months after the month in which dialysis was terminated.

The law now permits persons attaining age 65 who are ineligible for hospital insurance, either as cash beneficiaries or under the transitional provisions, to voluntarily enroll for hospital coverage. Coverage under this provision was effective July 1, 1973, and the monthly premium set at $33. The premium has risen each year. It reached $89 on July 1, 1981, and $113 on July 1, 1982. The premium represents the estimated per capita cost for services furnished under the hospital insurance program. Individuals may enroll in the HI program only if they also enroll for SMI. Enrollment periods for hospital protection are the same as the initial and general enrollment periods under SMI.

Persons who retired from Federal service after July 1, 1960, and had the opportunity to be covered by the Federal Employees Health Benefits Act of 1959, are ineligible for hospital insurance benefits under the transitional provision.[3]

Aliens with less than 5 years of continuous residence in the United States and persons convicted of crimes against the security of the United States are also ineligible.

Supplementary medical insurance

Persons entitled to benefits under the hospital insurance program, retired Federal employees, aliens residing in the United States, and persons not eligible for hospital insurance under the transitional provisions may participate voluntarily in the SMI program. Prior to July 1, 1973, a person had to file a written request with the Social Security Administration during specified periods to enroll. To prevent loss of or delay in entitlement, the 1972 amendments provided for automatic enrollment in SMI for persons as they become entitled to hospital insurance. Individuals may decline SMI enrollment. If they withdraw before coverage starts, there is no premium liability, nor are they charged with an enrollment.

Individuals may enroll in the SMI program only during the initial and general enrollment periods. The initial enrollment period begins with the 3rd month preceding the one in which they are first eligible and ends 3 months after the month of attainment of age 65, a total period of 7 months. If they enroll during the 3 months *prior* to the month in which they are first eligible, coverage is effective with the month in which they are first eligible; if they enroll *during* the month they are first eligible, coverage begins the following month; if they enroll in any of the 3 months *after* they are first eligible, coverage begins from 2 to 3 months after enrollment, depending on how long the person waited before enrolling.

Beginning with 1969, SMI general enrollment periods are from January 1 through March 31 of each year for those who did not enroll in their initial enrollment period, or those who previously terminated their enrollment and wish to re-enroll. Persons who enroll during a general enrollment period are covered by SMI beginning with July 1 of the year in which they enroll. Prior to the 1972 amendments, eligible individuals had to enroll within 3 years after the end of their initial enrollment period or within 3 years after termination of prior enrollment. The 3-year limitation is no longer applicable. The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) repealed SMI continuous open enrollment, which was established by the Omnibus Budget Reconciliation Act of 1980 (Public Law 96-499), and reinstated the general enrollment period that occurs January 1 through March 31 of each year.

A State may enroll eligible aged and disabled individuals who receive cash payments under the supplemental security income program or State supplementation programs, or who are otherwise eligible for medical assistance under Title XIX if: (1) prior to January 1, 1970, the State requested that a State-Federal enrollment agreement be established, and (2) the State pays the necessary premiums. The Omnibus Reconciliation Act of 1980 (Public Law 96-499) permitted States that did not have buy-in agreements to enter into such agreements, and States that had buy-in agreements that covered only cash assistance recipients to cover other Medicaid eligibles. This provision was effective during calendar year 1981 only, during which time several States submitted letters of intent to enter into initial buy-in agreements or to extend coverage.

For a person 65 years of age and over, enrollment terminates with the beginning of the month following the month of death. For a disabled person, coverage terminates with the end of entitlement to benefits based on disability. For a person with end-stage renal disease, coverage ends 36 months after the month in which an individual undergoes a successful kidney transplantation. Otherwise, social security and railroad retirement beneficiaries may give notice of their desire to withdraw from the SMI program at any time; their coverage is terminated at the close of the following calendar quarter. Other enrolled persons may terminate their coverage by withholding payment of premiums or by notifying the Health Care Financing Administration in writing of their desire to withdraw from the program. The beneficiary is provided a 90-day grace period for the payment of overdue premiums; at the end of that period coverage is automatically terminated. The 1972 amendments extend the 90-day grace period for an additional 90 days when the Secretary finds there is a good cause for failure to pay the premium before the end of the initial 90-day grace period.

---

[3] The Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248) extended coverage to Federal employees, requiring them to pay the hospital insurance portion of the Federal Insurance Contributions Act tax for wages paid after December 31, 1982.

Financing the program

Hospital insurance

The hospital insurance program is financed primarily through a tax on a portion of current earnings in employment covered by the Social Security Act. The maximum amount of annual earnings to which the tax is applied began at $6,600 for calendar year 1966. The amount has increased to $32,400 for 1982. The same tax rate applies to employees, employers, and self-employed persons. Initially the rate was 0.35 percent in 1966. By 1982, it had increased to 1.30 percent. Rates increase for future years up to 1.45 percent for 1986 and thereafter. The proceeds of this tax and monies collected from the railroad retirement system (with respect to the coverage of railroad retirement beneficiaries) are placed in the Federal hospital insurance trust fund. Reimbursement for all benefits and administrative expenses incurred under the hospital insurance program is made from this trust fund. Additional sources of revenues for the hospital insurance trust fund include reimbursement from the general fund of the Treasury for costs of persons who qualify for hospital insurance under the transitional provisions, amounts paid for hospital insurance coverage by persons voluntarily paying the premiums, and interest earned on those funds not required to meet current expenditures that are invested in interest-bearing Federal obligations.

Supplementary medical insurance

The revenues of the supplementary medical insurance (SMI) trust fund are derived from premiums paid by, or on behalf of persons enrolled, contributions by the Federal Government from general revenues, and interest on funds deposited with the Treasury. Benefits and administrative costs are paid from monies in the SMI trust fund.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal civil service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Health Care Financing Administration (HCFA) or the Railroad Reitirement Board and have a 90-day grace period in which to make payment. A person is given an additional 90 days to pay the premium when the Secretary finds there is a good cause for failure to pay the premium before the end of the initial 90-day grace period. Premiums may be paid for as long as a year in advance. For individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

The Secretary of the Department of Health and Human Services is directed by law to determine the SMI premium rate each year. The amount, prior to the amendments of 1972, was required to produce revenue equal to one-half the expected benefit and administrative costs incurred under SMI during the period in which the rate applied. Between 1966 and 1972, the premium increased from $3.00 to $5.80 a month. The 1972 amendments changed the method of premium determination. The standard monthly premium rate is determined in December each year and is applicable for 12 months beginning the following July.[4] The monthly premium rate is limited so that in any given year the premium can rise by no more than the same percentage by which cash benefits had been increased since the premium was last increased. In addition, the monthly premium rate may not exceed the actuarial rate, that is, that amount required to pay for one-half the expected monthly per capita cost of SMI for the aged. The remaining cost of the SMI program not covered by premium revenue is paid by the Federal Government from general revenues. The standard monthly premium rate was $11.00 effective July 1981 and increased to $12.20 in July 1982.

Administration of the program

Hospital insurance

Under the hospital insurance (HI) program, groups or associations of providers on behalf of their members may nominate a national, State, or other public or private agency or organization to serve as an intermediary in the benefit claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its association's nominee with approval of the Secretary of the Department of Health and Human Services (DHHS) and agreement of the intermediary selected. In addition, a provider may deal directly with the Health Care Financing Administration (HCFA).

The Secretary may enter into an agreement with a nominated organization if it is thought to be consistent with effective and efficient administration of the HI program. Under the agreement, the intermediary determines the provider's reasonable costs for items and services covered by the program, makes payment, and assists in the application of safeguards against unnecessary use of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services, (2) serving as a center for communicating with providers, and (3) making audits of provider recorders. Hospital insurance intermediaries also make payments for home health and outpatient hospital services covered by supplementary medical insurance (SMI).

Under the law, the reasonable costs of services are determined pursuant to regulations established by the Secretary. These regulations prescribe the method(s) used to determine costs and the items to be included; they take into account both direct and indirect patient care costs (Code of Federal Regulations, Title 42, Chapter IV: Subpart D: Revised as of October 1, 1980).

---

[4] The Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248) set the standard monthly premium rate at one-half the actuarial rate for aged enrollees. This modification was originally to be effective July 1, 1983 through June 30, 1985. After June 1985, the calculation of the premium rate would revert to the current law method. However, the Social Security Amendments of 1983 (Public law 98-21) retained the SMI premium at the June 1983 amount through December 1983, after which premium adjustments will be made on a calendar year basis.

Requests for Medicare payment for covered services generally are submitted by the provider of services; they must be signed by the beneficiary (or someone for him, if the beneficiary is unable to do so). The provider is reimbursed on the basis of reasonable costs of covered services, and bills the beneficiary for deductible and coinsurance amounts as well as for services not covered by the program.

Section 223 of the Social Security Amendments of 1972 (Public Law 92-603) authorized the Secretary of DHHS to set prospective limits on allowable costs incurred by a provider of service that will be reimbursed by Medicare. Schedules of limits on hospital inpatient general routine operating costs were published and in effect for cost reporting periods beginning on or after July 1, 1974. The limits reflect geographic area, including urban/rural location, bed size, a market basket index based on the price of goods and services purchased by the hospital, wage price index, and measures of under-utilization. The Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248) extended the Section 223 limits to include ancillary costs applied on a cost-per-case basis and to adjust each hospital's limit by its case mix.[5]

Section 223 limits on allowable skilled nursing facility (SNF) inpatient routine service costs went into effect for accounting years beginning on or after October 1, 1979. SNF limits reflect a market basket index, a wage index, and geographic locaiton.

Section 223 limits on allowable home health agency (HHA) per visit costs by type of service went into effect for accounting years beginning on or after July 1, 1979. HHA limits reflect a classification system based on a market basket index, a wage index, and geographic location.

In some instances, hospitals may bill the program on a physician's behalf for services rendered to inpatients. In these cases, payment is made by the HI intermediary. For this type of billing, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services. The intermediary selected by the provider reviews claims for payment and pays the provider. Actual payment for individual claims is made on the basis of an interim rate established between the provider and the intermediary. Final settlement for each provider's operating year is made on the basis of a cost report submitted by the provider, which is subject to an independent audit.

Payment cannot be made to Federal facilities except for emergency services, unless the provider serves as a community institution. In addition, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary medical insurance

Under the SMI program, the Secretary of DHHS may contract with carriers for the performance of specified administrative functions. The carrier's principal function is to determine whether charges are allowable (reasonable) and to make payment. Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items of services. In addition, carriers are to assist in applying safeguards against unnecessary use of services.

The allowable charge, on which the Medicare SMI payment is based, may not exceed the lowest of (1) the physician's or supplier's customary charge for the service, (2) the prevailing charge in the locality for similar services, or (3) the charge applicable for comparable services under comparable circumstances to the policyholders or subscribers of the carrier. The 1972 amendments provided that increases in the prevailing charge levels would be limited by an economic index furnished by HCFA to all carriers. The economic index relates physicians' fee increases to increases in physicians' practice expenses and increases in the general earnigns level.

Allowable charges are updated annually to take into account the actual charges physicians and suppliers have billed for covered services in the preceding calendar year. The revised allowable charge levels go into effect on July 1 of each year or as soon thereafter as they can be incorporated into the carrier's payment system. Thus, for the 12-month period beginning July 1, 1981 (fee screen year 1982), allowable charge levels were calculated from actual charge levels for calendar year 1980. For the 12-month period beginning July 1, 1982 (fee screen year 1983), allowable charge levels were calculated from actual charge levels for calendar 1981. However, allowable charges may not exceed the upper limit of the prevailing charges set by law at the 75th percentile of customary charges (weighted by frequency) made for similar services.

Claims for payment of SMI benefits may be submitted to the carrier either by the patient or by the physician or other supplier of services. If a physican or supplier agrees to accept the allowed or reasonable charge determined by the carrier as the total charge (that is, accepts assignment), the physician or supplier submits the bill to the carrier and is directly reimbursed. The patient remains responsible for the remaining 20 percent of the allowed charges for covered services and the applicable deductible amount. If the physician does not accept assignment, the patient submits a claim (an itemized bill) directly to the carrier and receives direct payment of benefits for covered services. The patient remains responsible for the physician's (or supplier's) bill.

---

[5] The Social Security Amendments of 1983 (Public Law 98-21) replace (for most hospitals) the retrospective cost reimbursement system and the cost-per-case limits and rate of increase ceiling created by the Tax Equity and Fiscal Responsibility Act of 1982. Effective with hospital cost-reporting periods beginning on or after October 1, 1983, Medicare payments for inpatient operating costs are to be based on a fixed amount, determined in advance, for each case, according to one of 470 diagnosis related groups (DRG's) into which a case is classified. The prospective payment is considered payment in full; hospitals are prohibited from charging beneficiaries more than the statutory deductible and coinsurance. Additional payments, determined by nondiagnostic criteria, are made to hospitals by the program for various "pass-through" costs.

For SMI services incurred after March 1968, claims must be filed no later than the close of the calendar year following the year in which the services are furnished. For services provided during the last 3 months of the calendar year, bills may be submitted through the end of the 2nd year following.

Alternative health care organizations

Group practice prepayment plans

Organizations that provide SMI services (or arrange for their availability) on a prepayment basis are referred to by HCFA as group practice prepayment plans (GPPP's).[6] GPPP's may participate in Medicare under one of two alternative methods of reimbursement. Plans that deal with medicare carriers use the reasonable charge option. Actual payments are made through a variety of methods (a prospective composite fee schedule, or charges related to the premiums paid, or reasonable charges on a non-bill basis).[7] Plans that deal directly with HCFA use the reasonable cost option based on the cost reimbursement principles applied to Medicare providers of services.

Health maintenance organizations

Prior to the 1972 amendments, plans that provided comprehensive services (for example, health maintenance organizations) could be reimbursed under Medicare on a capitation basis only as a GPPP. Plans that also provided inpatient hospital, skilled nursing facility, and home health care as covered benefits to their members billed Medicare through intermediaries the same as any other provider for these services.

The Social Security Amendments of 1972 (Public Law 92-603) authorized Medicare reimbursement to health maintenance organizations (HMO's) on a capitation basis for HI as well as SMI services. An HMO is an integrated organization of various health providers with overall responsibility for the total health care of its enrollees. It provides comprehensive health services, either directly or by arrangement with others. For Medicare purposes, an HMO must generally provide all of the Medicare-covered services usually available in its service area. Plans that do not choose to participate or cannot qualify under the HMO option may continue to receive Medicare reimbursement on this basis under the GPPP regulations.

Currently, HMO's receive interim monthly capitation payments based on either reasonable cost or risk contracts. Under reasonable cost contracts, Medicare payment is made on an interim basis using a monthly capitation. At the end of the HMO's contract year, payments are adjusted to reflect the reasonable costs of covered services. Under risk contracts, reimbursement is similar to reasonable cost contracts except that a comparison is made between the HMO's cost with its adjusted average per capita cost (AAPCC). The AAPCC for an HMO is an actuarially adjusted estimate of what an average person in a group of Medicare HMO enrollees would have cost the program had that person not been enrolled in the HMO. If the risk-based HMO's costs are less than the AAPCC, it shares with the Medicare program in the savings, up to a maximum of 10 percent of the AAPCC.[8]

Plans that do not choose to participate under either HMO or GPPP regulations may continue to bill Medicare, through carriers and intermediaries, for all Medicare-covered services provided to their members who are Medicare beneficiaries. The majority of the existing HMO-type plans are in this category.

---

[6] Final regulations published in the *Federal Register*, Vol. 47, No. 251, Thursday, December 30, 1982, changed the term "Group Practice Prepayment Plan" (GPPP) to "Health Care Prepayment Plan" (HCPP), effective January 31, 1983.

[7] Final regulations published in the *Federal Register*, vol. 47, No. 251, Thursday, December 30, 1982, eliminated special reasonable charge rules for prepayment plans, effective January 31, 1983.

[8] The Tax Equity and Fiscal Responsibility Act of 1982 (Public Law 97-248), in addition to authorizing cost contracts, authorizes prospective reimbursement under risk-sharing contracts with HMO's and other eligible organizations at a rate equal to 95 percent of the AAPCC. Regulations are being developed to implement this provision. However, the effective date is dependent upon the Secretary notifying Congress that he or she is reasonably certain that the methodology for determining the prospective rate on 95 percent of the AAPCC is developed and can be implemented.

Appendix B: Sources of data

The statistical system of the Medicare program

The data contained in this report are derived from the Medicare Statistical System (MSS). This data collection system provides the information necessary to measure and evaluate program operations and effectiveness. The MSS is a byproduct of the data processing required to administer the Medicare program. Thus, several categories of administrative program data have counterparts in MSS. Claims processing operations furnish information about the amount and kind of hospital and medical services used by Medicare enrollees and program payments for such services. Applications submitted by institutional providers to particiapte in the program provide data on the characteristics of providers of services. Various entitlement operations provide data on program eligibility and demographic characteristics of persons enrolled for coverage. The health insurance claim number assigned to each enrollee serves as a link between data on volume and types of services used, program payments for such services, and demographic characteristics of each individual.

Basic records

The statistical system is based on four groups of related records: the master enrollment record, the provider record, the hospital insurance and other institutional services utilization record, and the medical insurance payment record. Groups of similar individual records are stored together in a variety of basic files.

Master enrollment record

A Medicare master enrollment record identifies each aged and disabled person enrolled for benefits and indicates whether he or she is entitled to hospital insurance benefits, to supplementary medical insurance benefits, or to both. The enrollment record provides the population data for each part of the program and serves as the base for the computation of a variety of utilization rates.

Provider of service record

Hospitals, home health agencies, skilled nursing facilities, outpatient facilities such as rural health clinics and dialysis centers, independent clinical laboratories, and suppliers of portable X-ray or outpatient physical therapy services must apply for participation in the Medicare program. Data on the application forms are stored as individual provider records in a central providers of services file. This file is updated periodically as facilities are recertified, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, characteristics of facilities and agencies that provide care can be related to the kinds and amounts of service used.

Utilization record for hospital insurance and institutional services under medical insurance

The administration of the hospital insurance (HI) program requires that two items of information be known about each person at the time of admission to a hospital—entitlement status under the program and previous use of benefits. When a Medicare patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital. This record is forwarded to an intermediary which in turn queries the Health Care Financing Administration's (HCFA) central office to determine eligibility, deductible status, and benefits remaining. The intermediary is informed of the patient's benefit status and the number of days of inpatient care to which he or she is entitled during the current benefit period. This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When payment is approved, the intermediary forwards the claim to HCFA.

The admission notice and subsequent billing forms are used to create various utilization records. As part of this process, information on diagnoses and surgical procedures is coded. Admission (or start of care) notices and billing forms are handled in a comparable manner for home health agencies (under HI and SMI) and skilled nursing facilities. An outpatient hospital billing form is also transmitted to HCFA for entry in central office records after the intermediary approves the bill for payment.

Information on utilization experience in hospitals and skilled nursing facilities needed to administer the "benefit period" provision is recorded centrally. Each admission and billing form contains the enrollee's claim number and the provider's identification number. The resulting record can readily be matched to the enrollment files and the provider files. By this process, sample satistical records are created. Different sample sizes are used for inpatient hospital, skilled nursing facility, home health, and outpatient hospital utilization records. The statistical records contain the information used to tabulate and analyze HI and SMI institutional utilization patterns.

Payment record for supplementary medical insurance

Payment or reimbursement under the SMI program is made after carriers (or intermediaries involved with Part B noninstitutional providers under the Medicare program) receive bills with allowed charges in excess of the SMI deductible for a calendar year.

To pay an SMI claim, carriers need to know from a central source the enrollee's entitlement status and for most claims the amount of the annual deductible that has been met. After the deductible has been met, the only additional information required from HCFA is whether the person is still enrolled under the program.

Administration of the SMI program requires accurate and complete information on the amounts paid by carriers for physicians' services and other health services and supplies covered by the program. Carriers furnish

HCFA a payment record of each bill paid. A bill is defined as a request for payment from, or on behalf of, a beneficiary as a result of services provided by a single physician or supplier.

Data sources for detailed tables

Medicare enrollment, 1982

Enrollment data for 1982 enrollment counts are from the master enrollment record file summarized on March 25, 1983. Most of the enrollment and age data reflect status as of July 1, 1982. Limited data on monthly enrollment and persons ever-enrolled during 1982 are also shown. Geographic data reflect the mailing address as of March 25, 1983.

Medicare reimbursement, 1982

Reimbursements for HI and SMI reflect amounts paid in 1982 to, or on behalf of, insured persons. Amounts shown are based primarily on bills processed through June 1983, with approval dates in 1982. The report also includes some bills processed with approval dates prior to 1982 that were received too late to be included in reports covering previous years. Retroactive adjustments to program payments that occur as part of the cost settlement process are excluded from this report.

Medicare utilization, 1982

Data reflect use of, and amounts reimbursed for, services performed in 1982 and recorded on HI bills and SMI payment records received in HCFA central records through June 30, 1983. The criteria for selecting bills and payment records were: hospital or SNF bills (Form 1453) with discharge dates or date of service in 1982; bills for home health (Form 1487) and outpatient (Form 1483) services with the last date of service in 1982; and payment records for services incurred in 1982.

Data for physicians' and other medical services from payment records are derived from: Form 1490, used to request reimbursement for services provided by physicians and suppliers of medical services, including ambulance and independent laboratory services; Form 1554, used by hospitals to bill for hospital-based physicians; and Form 1556, used by group practice prepayment plans dealing through a carrier. The uniform bill, Form 1500, is being phased in to replace Medicare's Form 1490.

Appendix C: Definitions and limitations of data

Program related terms

Aged beneficiaries—Persons 65 years of age or over entitled to monthly Social Security Administration (SSA) benefits or payments from the Railroad Retirement Board (RRB), persons uninsured for SSA or RRB benefits but transitionally insured for Medicare, and persons 65 years of age or over not included in the above groups who purchase HI and SMI coverage. Included are persons 65 years of age or over identified as having end-stage renal disease (ESRD).

Disabled beneficiaries—Persons under 65 years of age entitled to SSA disability benefits for at least 24 months, including those receiving SSA disability benefits and identified as having ESRD, and those deemed disabled solely because of ESRD. Disability beneficiaries are further classified according to the type of disability entitlement under SSA, that is, disabled workers, adults disabled as children, and disabled widows and widowers.

Type of coverage—Medicare provides two basic types of insurance: a hospital insurance (HI) plan and a voluntary supplementary medical insurance (SMI) plan. Most aged persons may be covered by either one or both plans. However, those aged persons paying a premium for HI coverage must also enroll for SMI coverage. Disabled persons may not enroll for SMI coverage without HI coverage, except in circumstances where entitlement was awarded through government error that warranted equitable relief.

Mid-point enrollment—Enrollment as of July 1 has been chosen as the denominator for utilization rates published in this Medicare data series. The choice was based on the similarity of the July 1 enrollment to a 12-month average enrollment. A comparison of aged HI enrollment by age, race, and sex on July 1, 1982, with an average of 12 monthly enrollment figures in 1982 showed remarkable similarity.

Persons ever enrolled—Persons eligible for benefits at any time during a calendar year. By subtracting the number of persons receiving reimbursement from those ever enrolled, a count of persons who did not receive any reimbursement is obtained. Persons not reimbursed include those who did not use covered services, those who used covered services for which the charges did not exceed the HI or SMI deductible, and those who used covered services that exceeded either deductible but who did not submit claims.

Persons served—Persons are counted once for each type of covered service used, but are not double counted in aggregate totals. Thus, a person who receives inpatient hospital services and SNF services in a year is counted as receiving both of these services, but is counted only once in the all persons served under HI. A person receiving the same service two or more times in a year is counted as one person served. For example, persons having two or more hospitalizations during a year would be counted as one person served for inpatient hospital services. In a like manner, persons served under both HI and SMI are counted only once in the overall total (that is, hospital insurance and/or supplementary medical insurance). (See, also, *Change in benefit status.*)

Change in benefit status—When disabled beneficiaries attain age 65 they are reclassified as aged persons. If these persons have received reimbursement as both disabled and aged beneficiaries during the year, their reimbursements are aggregated in accordance with the status of the beneficiary at the time the medical service was rendered.

Medicare reimbursement—State and county reimbursements for HI and SMI reflect amounts paid in 1982 to, or on behalf of, insured persons. The amounts are based on bills entered in HCFA central office records through June 1983, with claim approval dates in 1982, plus some bills with approval dates prior to 1982 which were received too late to be included in previous reports.

Only program reimbursements for covered services are included. Administrative costs, deductibles, copayments, retroactive adjustments, and SMI reimbursements to group practice prepayment plans (GPPP's) and health maintenance organizations (HMO's) dealing directly with HCFA are excluded.

Amounts reimbursed under the HI program are based on interim rates that are adjusted after the end of each provider's accounting year on the basis of reasonable costs of operation. Similar retroactive adjustments are made for home health and outpatient services covered by SMI. Other payments under SMI are based on allowed (reasonable) charges for medical services determined on the basis of customary and prevailing charges. The actual trust fund benefit payments for the Medicare Program during calendar year 1982 (excluding administrative expenses and cost of experiments and demonstration projects) were $35.6 billion for hospital insurance and $15.5 billion for supplementary medical insurance.

Medicare utilization—Data reflect services furnished and amounts paid for services performed in 1982. The tabulations include bills received and recorded in HCFA central office records through June 30, 1983. (See the section on data sources for detailed tables for bill and payment record selection criteria.) Data are reported by the residence of the beneficiary as indicated on the earliest dated bill in that year. Reimbursements are interim amounts, adjusted at the end of each provider's accounting year, and exclude deductibles, copayments, administrative costs, noncovered services, and reimbursements to HMO's and GPPP's dealing directly with HCFA.

Geographic classifications

All areas—Consists of the United States, Guam, Puerto Rico, Virgin Islands, other outlying areas, and foreign countries.

All other areas—Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Guam, Mariana Islands, Marshall Islands, Midway Islands, Virgin Islands, and Wake Islands.

County—The primary divisions in most States are counties. In Louisiana, however, divisions are called parishes, and in Puerto Rico, they are called municipios. Guam and the Virgin Islands are not subdivided. Alaska is divided into 29 census divisions which are used as the equivalents of counties. A number of cities that are independent of county organizations are reported separately in Maryland, Missouri, Nevada, and Virginia.

County unkown—Persons whose mailing addresses do not permit identification of county of residence are included in figures for States but not in figures for metropolitan and nonmetropolitan counties, or for SMSA's. There is one exception: where there is only one type of county in a State, figures for county unknown are assigned to that type.

Metropolitan and nonmetropolitan counties—The division of counties into metropolitan and nonmetropolitan groups is based on the list of standard metropolitan statistical areas (SMSA's), published by the Office of Management and Budget (see Statistical Reporter, October 1981). Except in New England, each SMSA includes a county that contains a central city of at least 50,000 inhabitants, based on the 1980 census. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities rather than counties. However, the mailing address in the master enrollment record file is coded only for State and county. Therefore, for New England, the SMSA was replaced by the metropolitan State economic area (SEA), which is defined in terms of whole counties. Metropolitan counties are those counties that are included in an SMSA or a metropolitan SEA. These counties are further divided into those with a central city and those without a central city. Nonmetropolitan counties are those that fall into neither an SMSA nor a metropolitan SEA.

Place of residence—The beneficiary's place of residence classification is a mailing address, not necessarily an actual place of residence. Some beneficiaries have their checks mailed to a post office or to a representative payee in a State or county that may differ from the residence of the beneficiary.

Temporary or permanent changes in address are recorded as beneficiaries report them. Only the most recently reported mailing address is in the master enrollment record file. The address in the file on the date of tabulation is used for all tables in Medicare Enrollment, 1982, and Medicare Reimbursement, 1982. For Medicare Utilization, 1982, the State of residence is determined from the residence entered on the earliest dated bill in the year.

SMSA, Metropolitan SEA—See above. Only areas in the United States are listed.

*State unknown*There were 23,000 aged and 3,000 disabled persons with unknown State of residence recorded in the master enrollment record file in 1982. Most of these entries for the aged were the result of processing errors of codes for State or foreign countries. Most of the unknown State of residence records for the disabled were incomplete temporary enrollment records established for persons with end-stage renal disease.

United States—Consists of the 50 States, the District of Columbia, and residence unknown.

Demographic classifications

Age—Ages for all persons alive at the end of a year are calculated as of July 1 of that year. For persons dying during the year, ages are calculated as of the first day of the month of death. In tables showing enrollment by month of coverage, ages for all persons alive at the end of a year are calculated as of the reference month shown in the body of the table. In tables showing persons ever-enrolled, ages are calculated as the oldest attained in the year.

Race—Categories include white, all other races, or unknown, as entered into the master enrollment record file from basic records completed by the beneficiary. A race distribution is shown for an SMSA if at least 10 percent of the hospital insurance beneficiaries are classified as "all other races."

Race unknown—Race unknown, whether or not displayed in a table, is included in the "all persons" or equivalent totals. On July 1, 1982, the number of aged HI beneficiaries without a race designation was more than 745,000. There were 57,000 disabled persons (primarily RRB beneficiaries) whose race was not known. The relatively high proportion of RRB beneficiaries without a race designation is because of incomplete data exchange procedures.

Sex—As recorded in the master enrollment record file.

Appendix D: Sampling method and reliability of estimates

Data in the utilization section are based on the bills (the statistical records for the claims submitted by most institutional providers) and payment records (the statistical records for physicians' claims and noninstitutional providers) for a 5-percent sample of enrollees 65 years of age or over and a 25-percent sample of disabled enrollees. Samples are selected on the basis of the enrollee's health insurance number. Since this number appears on every claim, all bills and payment records for an individual can be summarized by type of benefit into an individual record. Sample counts are multiplied by 20 (aged) or by 4 (disabled) to obtain the Medicare population estimates shown in the tables in this section.

Because the estimates are derived from a sample, they may differ from estimates derived from other possible samples of the same size and design. The difference between a sample estimate and the average of estimates from all possible samples is called the sampling error. The standard error of a sample estimate is a measure of the variation among the estimates from all possible samples. It is also a measure of the precision with which an estimate from a particular sample is likely to approximate the average estimate from all possible samples. Another measure of the variation among the estimates derived from possible samples is the relative standard error, which is defined as the standard error divided by the value being estimated.

The sample estimate and an estimate of its standard error may be used to construct an interval estimate that includes the average result of all possible samples with prescribed confidence.

To illustrate, if all possible samples were selected under essentially the same conditions, and an estimate and its estimated standard error calculated for each sample, then:

1. Approximately two-thirds of the intervals from one standard error below the estimate to one standard error above the estimate would include the average value of all possible samples. An interval from one standard error below the estimate to one standard error above the estimate is called a two-thirds confidence interval.
2. Approximately nineteen-twentieths of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average value of all possible samples. An interval from two standard errors below the estimate to two standard errors above the estimate is called a 95-percent confidence interval.
3. Almost all intervals from three standard errors below the sample estimate to three standard errors above the sample estimate would include the average value of all possible samples.

Thus, for a particular sample, one can say with specified confidence that the average of the estimates from all possible samples is included in the constructed interval.

In the formulae used to derive estimates of standard errors, a number of approximations were made. As a result, the tables presented provide an approximation of the exact standard error for any specified item.

Number of persons

Tables 1 and 2 contain approximate standard errors for estimates of the number of persons using (and conversely not using) specific types of reimbursed services for the aged and disabled, respectively. To estimate approximate standard errors of estimates not presented directly in the tables, linear interpolation or the following formula may be used:

(1) standard error of estimate =

$$s_{X'} = \sqrt{\left(\frac{1-f}{f}\right) \cdot \left(\frac{X'(N-X')}{N}\right)}$$

where X' = estimated number of persons
f = sampling fraction (0.05 for the aged and 0.25 for the disabled)
and N = the universe size (26.5 million for the aged and 3 million for the disabled)

As an example, using formula 1 to estimate the standard error associated with an estimate of 7,500 aged persons using services gives the following:

$$s_{X'} = \sqrt{\left(\frac{1.0-0.05}{0.05}\right)\left(\frac{7{,}500 \times (26{,}500{,}000-7{,}500)}{26{,}500{,}000}\right)}$$

$$= \sqrt{19 \times 7{,}497.88}$$

$$= \sqrt{142{,}459.67}$$

$$= \sqrt{377.4}$$

An approximate two-thirds confidence interval can be constructed by adding and substracting 377 (one standard error) to the estimate of 7,500. Thus, the confidence interval ranges from 7,123 to 7,877. An approximate 95 percent confidence interval can be constructed by adding and subtracting 755 (twice the standard error) to the estimate of 7,500. Thus, this confidence interval ranges from 6,745 to 8,255. In a similar fashion, an approximate "99 percent plus" confidence interval can be constructed by adding and subtracting 1,132 (three times the standard error) to the estimate of 7,500. This confidence interval would range from 6,368 to 8,632.

Tables 3 and 4 present the approximate standard errors of estimated number of persons served per 1,000 enrolled. Double linear interpolation may be needed, since both the number of persons enrolled (in thousands) and the estimated number of persons receiving reimbursed services per 1,000 enrolled may require interpolation. A more accurate approximation of the standard error can be computed by dividing the standard error of estimated number of persons served (determined from formula 1) by the number of persons enrolled, expressed in thousands. As an example, in a theoretical situation where the estimated number of aged persons served per 1,000 HI enrollees is 100, and the base HI population (as of July 1) is 75,000, the estimated number of persons served is 7,500 (100 persons served per 1,000 enrollees times 75). The standard error of persons served (determined by formula 1 described above) is 377. Therefore, the standard error of the number of persons served per 1,000 enrollees is about 5 (377 divided by 75). Various intervals of prescribed confidence can be constructed for the rate per 1,000 enrollees as described earlier using one, two, or three times the standard error.

Total amounts reimbursed

Tables 5 and 6 present approximate relative standard errors for estimated total amounts reimbursed for the aged and disabled respectively. Relative standard errors are shown for selected HI and SMI (combined) reimbursement amounts (column 1), HI reimbursement amounts (column 2), and SMI reimbursement amounts (column 3). The relative standard error, when multiplied by the estimate, gives an approximate standard error which, as explained earlier, can be used to construct confidence intervals. For reimbursement amounts not shown in the table, linear interpolation can be used to determine the relative standard error.

Average amount reimbursed per enrollee

Tables 5 (aged) and 6 (disabled) are also used for obtaining approximate relative standard errors for estimated amounts reimbursed per enrollee. The estimate must first be multiplied by the enrollment (as of July 1) to give a total reimbursement amount which can be used to enter the table as outlined earlier. For total amounts not shown in the table, linear interpolation can be used to determine the relative standard error. For example, a given geographical area has an average reimbursement per aged enrollee of $1,000 (HI and SMI combined) and a July 1 Medicare aged population (HI and/or SMI) of 200,000. This gives an estimated reimbursement of $200 million, a value not listed in the table. An approximate relative standard error can be determined by interpolating the relative standard errors for the next lowest estimate ($100 million) and the next highest estimate ($300 million). This interpolation gives a relative standard error of 0.03480. The standard error of the estimated average reimbursement of $1,000 per aged enrollee is $1,000 × .0348, or $34.80.

Average amount reimbursed per person served

Tables 5 (aged) and 6 (disabled) present approximate relative standard errors for estimated average reimbursement per person served for HI and SMI combined (column 4), HI (column 5) and SMI (column 6). The estimate must first be multiplied by the number of persons served to give a total reimbursement amount which can be used to enter the table as outlined earlier. For total amounts not shown in the table, linear interpolation can be used (in a similar manner as described in the previous example) to determine the relative standard error.
